**Пособие по переводу английской экономической литературы (грамматические трудности) - М.: Экономический ф-т МГУ, 2010. - 60 с.**

Цель данного пособия – помочь студентам преодолеть грамматические трудности, с которыми приходится чаще всего сталкиваться при переводе английских экономических текстов. В пособии нет объяснений тех или иных грамматических явлений, так как теоретические принципы перевода достаточно полно и всесторонне изложены в учебных пособиях по теории перевода. Авторы предлагают модель перевода каждого такого явления и далее – упражнения, содержащие предложения с аналогичной структурой. Таким образом, у студентов вырабатывается навык опознания и понимания изучаемой структуры и нахождения ее эквивалента на родном языке. При этом авторы стараются не использовать сложные конструкции в качестве контекста изучаемого лексико-грамматического явления, чтобы не распылять внимание студентов на другие языковые особенности. Для закрепления материала предлагается делать «обратный» перевод полученного русского эквивалента на английский язык.

- 4 As incomes *are earned* from contributing to production, national income is logically equal to national output.
- 5 For the short- and long-term health of the economy, investment *is seen* as being of crucial importance.

- 6 Because financial accounts *are prepared* for shareholders it is essential that they are produced under a standard set of rules.

- 11 Only *being provided* with the required resources, an enterprise can work efficiently and increase its output.

# X. Gerund and gerundial construction

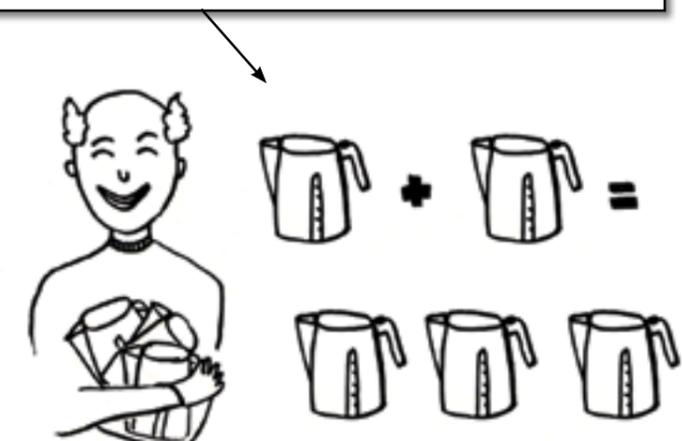

A) **GERUND**

**Model 1**

Supermarkets will be urged to drop “three for two” deals on food that encourage shoppers **into bulk-buying** more than they need, often leading to the surpluses being thrown away.

Правительство призвет супермаркеты отказаться от акций “три предмета по цене двух”, которые подталкивают покупателей **к приобретению** большего количества товаров, чем им нужно, в результате чего излишки часто выбрасываются.

- 1 In this chapter the emphasis is not **on learning** economics but **on mastering** the tools of the trade.
- 2 Models are frameworks **for organizing** the way we think about a problem.

- 4 Conservative people in rural areas were tremendously enthusiastic **about buying** shares of railroad stock, often mortgaging their farms or businesses to do so.
- 5 Current inflation levels are “worrying” and are set to stay high **before cooling** gradually next year.
- 6 Government sets guidelines to ensure fair competition **without using** direct control.
- 7 The laws have had some success **in preventing** fraud and secret dealings aimed **at manipulating** stock prices.

## B) GERUNDIAL CONSTRUCTION

### Model 2

We look forward to *much attention being given* to this question.

Мы рассчитываем на то, что этому вопросу *будет уделено большое внимание*.

- 1 Jobs and living standards depend on *the industrial capacity* of the nation *being used* to the full. A new firm can't enter the market without *its goods being distinguished* from others by means of an original trademark.
- 2 The stockholder doesn't mind *the investment interest being sent* to his account in the bank.
- 3 The difference in the results obtained appears to be due to *the equipment depreciation having been calculated* by different methods.
- 4 Foreign exchange analysts, despite all the fanfare and pep talk about *the United States reasserting* its leading role as a bastion of free enterprise, remain extremely skeptical that the dollar's strength can be sustained without the support of high interest rates.
- 5 With consumer prices in the euro area only 1% higher than they were a year ago, there is little risk of *currency depreciation causing* a dangerous surge in inflation.
- 6 While WTO accession would normally lead to *the United States lifting* Jackson-Vanik from Russia -- otherwise, Washington would be in violation of the trade organization -- the aide indicated that it was not certain that that would happen in this case.

# XI. "since/as/for/once" in adverbial clauses

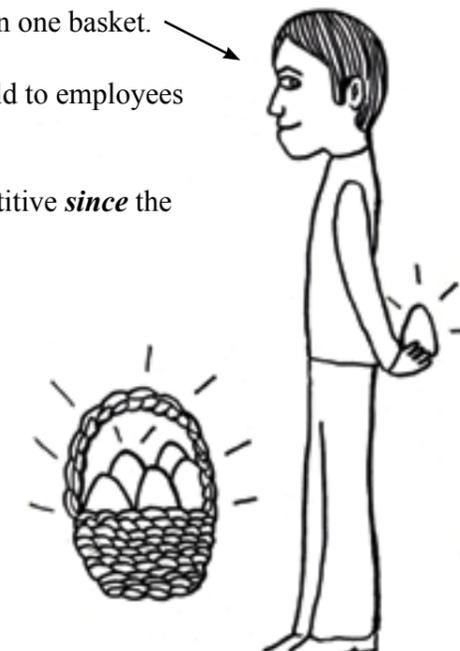

## A) "SINCE": REASON

### Model 1

Up to the present, international agreements on the prices of certain major goods have scarcely modified the situation *since* prices are always dictated by the big industrial powers.

До сих пор международные соглашения о ценах на некоторые основные товары практически не изменили положение дел, *поскольку* цены всегда определяются крупными промышленными державами.

- 1 *Since* people dislike risk, they will not put all their eggs in one basket.
- 2 It was not a typical privatization, *since* all shares were sold to employees – what we call an employee buyout.
- 3 As prices rise, the country gradually becomes less competitive *since* the nominal exchange rate remains fixed.
- 4 *Since* occupational pensions are deferred wages, affiliates must be actively involved in the setting up, implementation and control of occupational pension schemes, as well as in the monitoring and strategic management of pension funds.
- 5 Accounting has been called the language of business. That analogy is accurate, *since* accounting is a form of communication.
- 6 It should be remembered that accounting reflects the environment in which it operates. And *since* environments differ around the world it follows that accounting will also be different around the world.
- 7 *Since* most "money" is actually nothing more than a saving or checking account at a local bank, the most effective way for a central bank to control the economy is to increase or decrease bank

- 8 lending and bank deposits.  
*Since* most of the new technical knowledge is being produced by advanced countries, granting stronger protection to intellectual property means that developing countries, who are primary users of knowledge, end up transferring rents to the producers.
- 9 *Since* a competitive advantage often goes to the entrepreneur who is quick to exploit it, many small business owners see strategic alliances as an essential part of their plan for growth.
- 10 *Since* the real currency of such contracts is cash, rather than barrels of crude, there is no limit to the number of bets that can be made. And since no oil is ever held back from the market, these bets do not affect the price of oil any more than bets on a football match affect the result.

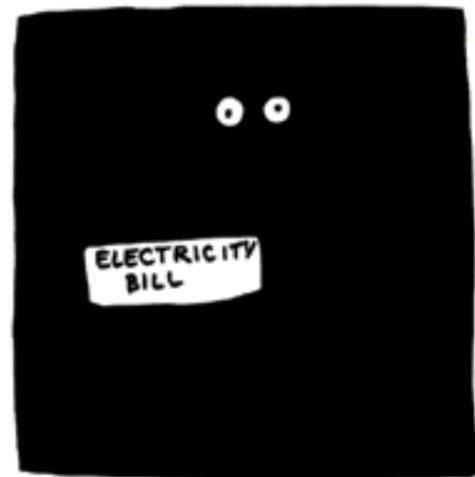

B) “AS”: REASON

**Model 2**

This is very important to understand especially for small businesses *as* you have to always think of your limited budget.

Это особенно важно понять малому бизнесу, *поскольку/так как* вам всегда приходится думать о своем ограниченном бюджете.

- 1 *As* he had not paid his bill, his electricity was cut off.
- 2 Greater confidence has driven down yields *as* investors needed less compensation for risk.
- 3 In Britain, government bond prices rose *as* investors continued to switch out of equities.
- 4 *As* Europe adopts the Anglo-Saxon model, so it becomes easier for students to transfer onto courses in other parts of the world that also have the same system, such as North America and Australasia.
- 5 “Choosing suppliers is a hard thing to do, but we are doing it nevertheless, *as* we intend to work here for a long time,” said the director for Renault in Russia.
- 6 But the world as a whole won’t suffer, *as* the great emerging economies of Asia - China and India - will carry on booming regardless.
- 7 Economic growth is the ultimate objective of economic policy *as* it provides the key to improve living standards and the provision of more and better social services.  
*As* quality is informally assessed by the price charged, it is important to choose a price that is consistent with the image of the product and the other elements of the marketing mix.

To form a limited partnership, partners must file a certificate of limited partnership with the proper state office, *as* state law governs this form of organization.

Maybe, *as* more people are forced to cut back, we will all start to think more carefully about how we spend our money.

C) “AS”: TIME

**Model 3**

Work-in-progress is kept to a minimum *as* goods are produced only *as* they are needed for the next stage of production.

Незавершенное производство сводится к минимуму, так как товары производятся лишь тогда, *когда* они нужны для следующей стадии производства.

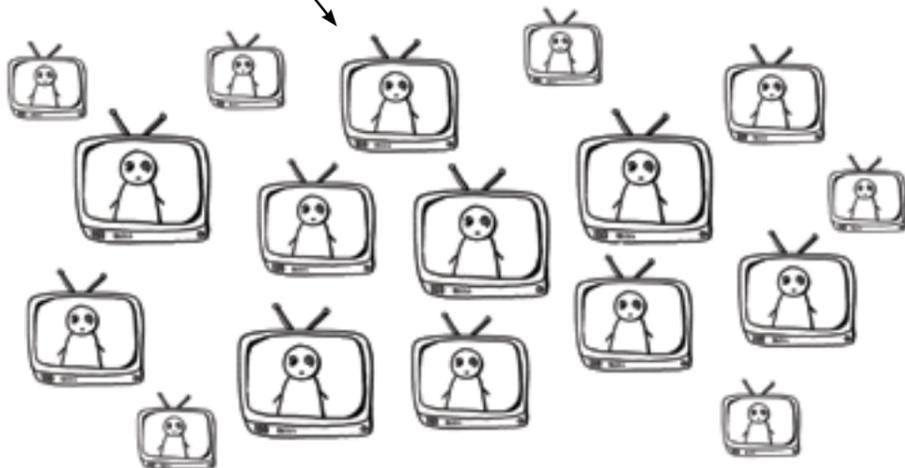

- 1 Even *as* the rest of the global economy slows down and some parts even flirt with recession, business in large parts of Africa is booming like never before.
- 2 All of them shared a sense of urgency *as* they watched the progress of a large and better financed competitor.
- 3 What happened was that the financial markets became more and more powerful at the same time *as* the controls on them became less and less stringent.
- 4 Mortgage rates are going up *as* the housing market is going down, and that’s not good.
- 5 In the future, *as* domestic gas prices increase and the cost of renewable energy technologies falls, the percentage share of renewables should grow.
- 6 A further sign of the hardship facing retailers came *as* the kitchen equipment and retailer Pro-Cook fell into administration.
- 7 The proportion of China’s exports that were first imported from elsewhere before being finished and sold on has dropped to 44 percent from over 50 percent last year, moving down *as* oil moved up.

D) **“FOR”**: REASON

**Model 4**

Television is the prime culprit **for** it has become the model for everything in our society.

Телевидение — главный виновник, **так как** оно стало моделью всего существующего в нашем обществе.

- 1 It does not make sense to charge all users the same rate, **for** users at different times impose very different marginal costs on society.
- 2 There is going to be a recession in America and probably in Britain too, **for** we have both sinned with our debt, our deficits and our soaring house prices.
- 3 It doesn't really apply to rich Japan, **for** its domestic economy is weak and so the loss of exports to the US will injure it more.
- 4 Technological advance means increased concentration of ownership, **for** the largest corporations are best able to develop and introduce new techniques.
- 5 When is an economic slump not a slump? The answer: When the economy in question is Japan's. **For** what Japanese economic and business leaders are all too ready to define as a «slump» or «slowdown» would be considered a rosy picture in virtually any other industrial country of the West.
- 6 When Dan Atkinson and I started work on our new book, The Gods That Failed, this time last year, our sense was that things were about to go seriously wrong for the global economy, **for** while the terminology had changed, the behaviour of markets had not.
- 7 This can only be done through control of credit as a public utility, **for** the causes of social distress are economic, and the economy is controlled through the monetary system.

E) **“ONCE”**: TIME

**Model 6**

**Once** full employment has been achieved, any further expansion of demand will stimulate inflation.

**Как только** будет достигнута полная занятость, любое увеличение спроса будет подстегивать инфляцию

- 1 The rules that Europe has adopted say that no country can withdraw from the Union **once** it enters.
- 2 **Once** the first entrepreneurial investment of capital has been made, someone must be hired to manage the new business, factory or other endeavor.
- 3 **Once** a company has sold its original stock to the public and it traded freely in the market, the price will be determined continuously during the trading day by what buyers will pay and what sellers will take.
- 4 Agency (a federal regulatory agency in America) officials acquire intimate knowledge of the business they regulate, and some officials are offered high-paid jobs in those industries **once** their tenure at an agency is ended.
- 5 Can you trust the records and paperwork that your bank keeps on you? You may be a little less happy to accept its version of events **once** you have read about Paul Walton, who was on the receiving end of what Royal Bank of Scotland admits was “a series of unfortunate errors”.
- 6 If faster economic growth is desired, revision of the tax structure is called for to permit a higher rate of investment **once** full use of resources is achieved.
- 7 It was hoped to drive down the price of gold. This would help to check any possible flight away from currencies and paper money which, **once** under way, might threaten a major disruption of the banking system such as occurred in the 1930s.
- 8 **Once** the business is established, it might also be necessary to obtain further funds for either expansion or the continuation of existing operations.
- 9 **Once** a corporation attains S status, it stops paying corporate income taxes and instead passes taxable income or losses on to the stockholders.
- 10 **Once** customers have evaluated brands and made their choice, they must still decide how and where to make the purchase.

## XII. Elliptical constructions

### Model 1

Very little, *if anything*, could be advanced in the defense of his policy.

*Почти* ничего нельзя (*фактически*, мало что можно) сказать в поддержку его политики.

### Model 2

*If anything*, it will be in their interests to follow this course.

*Во всяком случае (как бы то ни было)*, в их интересах следовать данным курсом.

- 1 You would have thought that, after the economy crashed in August, the arts in Russia would have grounded to a half. *If anything*, the opposite is the case.
- 2 What, *if anything* did the President bring back from Beijing? Above all, the event itself, the fact that it took place.
- 3 National governments like the European Commission weak, and even the voters do not want hyperactivity in Brussels. Nor should they: *if anything*, it should have less money to spend in future, not more.
- 4 New patterns of economic development have brought material affluence to the oil-rich countries of the Middle East. In contrast, poverty has, *if anything*, become more deeply entrenched in parts of sub-Saharan Africa.
- 5 *If anything*, Ireland has become less fiscally attractive to foreigners over the past few years: many of the grant and tax dodges once used to seduce them have gone.
- 6 The corporate sector is, *if anything*, more financially extended than the domestic.
- 7 There is always the chance that such an approach would slide into protectionism, pure and simple. But the alternative is, *if anything*, more risky.

### Model 2

The British people have to submit to new taxation, *however high*.

Британцы вынуждены мириться с новыми налогами, *какими бы высокими они ни были*.

- 1 *Whatever the source*, finance will be required at the start-up stage of a business.
- 2 *If successful*, the reform will not only restructure the financial mechanism of China's village and town authorities, but will also re-draw the country's rural political landscape, or even re-shape the grass-roots power regime of China.
- 3 But *whatever his long term aims*, the President's immediate intentions and motives were made relentlessly clear at his last Press conference less than three weeks ago.

- 3 *Had this policy been adopted*, the subsequent history of the treaty might well have been quite different.
- 4 To assess the social opportunity cost of tying up resources in a project in the nationalized industries, we need to ask what would have happened to the resources *had the project not been undertaken*.
- 5 *Had the supply side of the economy been* in better shape, a slowdown in demand growth would have been only temporary.
- 6 *Had the plan been* to auction the assets individually, Gazprom would have faced competition for at least some of these, a factor that would likely have driven prices higher.
- 7 *Had the reform succeeded*, California would have been the fifth state to insure nearly all its residents.

## Model 2

No longer *is Italian home-appliance maker Indesit coaxing* older workers to retire early to make room for younger recruits.

*Итальянский производитель бытовой техники Индезит* больше не *пытается уговорить* пожилых рабочих рано уйти на пенсию, чтобы освободить место молодым.

- 1 Never before *has the European Union invited* such a large group of countries which has had such a remarkably different social and economic system.

- 3 Lower interest rates may not stop house prices falling, *nor will they prevent* banks from tightening their lending standards.
- 4 The pound should no longer serve as a vehicle for the export of private capital and the return flow of profits and dividends, *nor should it be used* for military expenditures abroad.
- 5 The consequences for trade of the 10 per cent surcharge on imports attracted immediate attention, but the surcharge does not apply to all products, *nor is it* invariably 10 per cent.
- 6 But even if it did happen it would probably not be soon enough to prevent unemployment from rising. *Nor would it stop* the credit crisis from biting.
- 7 We must remember that the tax gap is simply not a pot of gold that we can dip into every time we want to pay for a new or expanded program. *Nor should it be viewed* as an easy solution to existing challenges, such as the alternative minimum tax.

### Model 4

*Not only will he* introduce a new bottom rate of income tax of 10% this April, but next year he will cut the basic rate from 23% to 22%.

- 1 *Not only are most of Great Britain's* imports and exports carried in British ships, but a good deal of trade in which Britain has no direct interest is undertaken by British shipping companies.
- 2 *Not only is income redistribution* unpopular with large parts of the electorate, it might also undermine the incentives that are considered necessary to encourage hard work and enterprise.
- 3 Owners of entrepreneurial businesses are keen to expand their business. *Not only will they have* a greater need for external finance, but their commitment to expansion overcomes any reluctance to share the business with others.
- 4 *Not only have prices dropped* but activity in the sector has also plunged - particularly for new properties.
- 5 The survey published yesterday revealed that *not only were banks lending* less to small and medium-sized businesses, they were also charging more and shying away from anything they considered risky.

- 9 *Not only has Middle Eastern oil money* made its way into American securities, but many people in Europe, Japan and other parts of the world feel that their best opportunity for securing their wealth is to invest in American stocks.

### Model 5

- 2 **It is** from this angle **that** Russia is viewing the development and furthering of integration on the continent.
- 3 In a market economy **it is** customers **who** decide what is to be produced.
- 4 It was the government's tight policy **which** allowed to reduce high rates of inflation.
- 5 **It was** the issued stocks **that** allowed the company to accumulate the necessary money for the new project.
- 6 Free enterprise as an idea can be simply described, but **it is** how this idea is applied to real life **that** is important.
- 7 Although **it was** Germany **which** had led a financial rescue operation earlier in the year, it was, ironically, the relationship with Germany which had probably done more to undermine Turkey's economic stability than any other single factor.
- 8 **It is** because we have become increasingly wealthy as a nation **that** we have been able virtually to eliminate child labor, to remove the necessity of work for many of the aged and to make it unnecessary for millions of women to take jobs.
- 9 The conventional thinking is that **it is** demand **that** effects inflation, that too much demand causes inflation.

### Model 6

With consumer demand falling and the economy moving towards recession, **there is** not a strong incentive to increase investment spending.

В условиях снижающегося спроса и приближающегося экономического спада **отсутствует** значительный стимул к увеличению инвестиционных расходов.

- 2 The fact that capital mobility reached record levels earlier in this decade was a clear sign that **there were** problems ahead.
